

ITN-Winterschool on
**Mathematical
Models for
Wetting:
Analysis and
Numerics**

February 13th-17th, 2012
Veilbronn (near Erlangen, Germany)

Courses:

- Giovanni Alberti (University of Pisa): Quasistatic evolution and contact-angle hysteresis in capillarity.
- Marco Fontelos (Centro Superior de Investigaciones Científicas, Madrid): Singularity formation in free-surface flow.
- Andreas Prohl (University of Tübingen): Convergent finite-element schemes for the Navier-Stokes equations with noise.

Organized by: Günther Grün (University of Erlangen)

Supported by: Initial Training Network *Fronts and Interfaces in Science and Technology* (FIRST) of European Union.

Conference fee:
350€ (board and lodging included)

Further information:

See <http://wetting.math.fau.de>
or contact Eduard Campillo-Funollet,
