WORKSHOP ON NON-SMOOTH ANALYSIS AND APPLICATIONS UNIVERSIDAD COMPLUTENSE DE MADRID FEBRUARY 7th-9th, 2007

The Workshop will take place at the Facultad de Matemáticas of the Universidad Complutense de Madrid, and it is organized as a specific activity of the **Interdisciplinary Mathematical Institute (IMI)**

This meeting is aimed to anyone interested in Nonsmooth Analysis, and PhD students are specially encouraged to attend it. The meeting will include the following expository three-hour courses:

- Nonsmooth analysis and applications in the calculus of variations and control, to be delivered by Francis H. Clarke (Université de Lyon).
- Smooth and nonsmooth analysis on Banach spaces, to be delivered by Robert Deville (Université de Bordeaux).
- Nonsmooth analysis on manifolds and applications to Hamilton-Jacobi equations, to be delivered by Daniel Azagra (Universidad Complutense de Madrid).

In addition, the meeting will also include a number of short **contributed talks**. All participants are kindly encouraged to register on-line for the Workshop. There will be no registration fee. Those participants willing to deliver a short talk should also send a tentative title and an abstract of their talk to the Organizing Committee, **before January 30th**, following the instructions given in the registration form of our web-page
