

Nonlinear Partial Differential Equations

Universidad Complutense de Madrid

Seminario A. Dou del Departamento de Matemática Aplicada

Viernes, 23 de septiembre de 2016

10:00 S. Fernández-Rincón (UCM, Madrid) A singular perturbation result in competition theory.

10:40 L. Maire (UCM, Madrid) Coupled versus uncoupled blow-up rates in cooperative logistic systems with n species.

11:20 A. Tellini (CNRS-EHESS, Paris) High multiplicity and bifurcation diagrams for positive solutions to a class of superlinear indefinite problems.

12:00-12:30 Coffe break.

12:30 E. N. Dancer (US, Sydney) The exact number of stable positive solutions for nonlinear elliptic partial differential equations with small diffusion.

(Opening Ceremony of the Seminar of Applied Mathematics, 2016-17)

MTM2015-65899
