WORKSHOP

“METODOS BAYESIANOS’17. MADRID”

Organizadores:

Stefano Cabras (Universidad Carlos III de Madrid)
Gonzalo García-Donato Layrón (Universidad de Castilla La Mancha)
Miguel A. Gómez Villegas (Universidad Complutense de Madrid)

Comité Científico:

Stefano Cabras (Universidad Carlos III de Madrid)
Juan José Egózcue (Universidad Politécnica de Cataluña)
Gonzalo García-Donato (Universidad de Castilla La Mancha)
Miguel A. Gómez Villegas (Universidad Complutense de Madrid)
Beatriz González-Pérez (Universidad Complutense de Madrid)
Eduardo Gutiérrez-Peña (Universidad Nacional de México)
Manuel Mendoza Ramírez (Instituto Tecnológico Autónomo de México)
Elías Moreno (Universidad de Granada)
Vera Pawlowsky-Glahn (Universidad de Gerona)
David Ríos Insua (Real Academia de Ciencias)
Michael Wiper (Universidad Carlos III de Madrid)

Bayesian methods are growing in applications and its applications and its implementation is becoming easier through time. Every three years the Bayesian Methods Group from Complutense University of Madrid has been organizing an international Bayesian statistical inference workshop. This time the organization is reinforced with people from Carlos III University of Madrid and from Castilla La Mancha University. The aim of this workshop edition is mainly highlighting the practical applications of Bayesian statistics, although it remains open to any paper in the field of Bayesian statistics.

We invite members of the International statistical community to join us in METODOS BAYESIANOS'17.MADRID.

PARTICIPATION: To participate, a less than 200-word abstract must be submitted to villegas@ucm.es. Abstracts and talks may be made either in Spanish or English.

IMPORTANT DATES:

15/April/2017 Abstract submission
31/May/2017 Acceptance/Rejection talk notifications
30/June/2017 Pay inscription
