

Data Science Client Solutions Intern

Madrid, Spain

Short Description of the role

An exciting opportunity for a Data Scientist / Statistician Intern; a position has arisen with Nielsen Data Science department. The ideal candidate must have an extensive experience on working with statistics and data analysis who has also worked providing consultancy services and expertise.

Company information

Nielsen is the world's largest market research company, helping the biggest names in retail and FMCG to understand their customers and enhance their brand performance.

At Nielsen, we pride ourselves on providing the clearest, most complete view of consumers and markets worldwide. Clients work with us for many reasons: to measure their market performance; to understand consumer behaviour; to diagnose and solve marketing and sales issues; and to identify and capture growth opportunities.

Data Science is at the heart of the business linking clients to the statistical backroom. We are responsible for ensuring the highest quality standards, communicating statistical concepts and providing relevant insight and solutions to client needs.

We are looking for an intern who will work closely with Data Science Country Lead for Spain. Person will have an opportunity to work with different projects & initiatives (incl. regional ones) as well as support daily tasks.

The Role

- **Supports Data Science Country Lead for Spain in daily tasks such as advance data analysis of client inquiries, sample compliance etc. as well as diverse projects & initiatives**
- Provides professional answers to data related queries based on analytical investigations
- Provides expert technical consultation with internal clients
- Participates in cross-department projects & initiatives
- Works across multiple countries as part of a wider Data Science team (WE+NA+AUS)
- Allows for personal growth and development

The Person

- Degree in Statistics/Mathematics/ADE
- Good knowledge of statistics
- Advanced proficiency in Excel, PowerPoint and Word
- SAS, R, SQL or similar skills are a plus
- Exceptional aptitude for data analysis and creative problem-solving
- A high degree of accuracy and attention to detail
- A strong communicator who is able to explain technical issues in a non-technical way
- An enthusiastic and flexible team player
- Excited by challenges, pro-actively interacting with others
