

European DataWarehouse (ED) is the first central platform in Europe for collecting, validating and making available for download detailed, standardised level data for specific asset-backed securities (ABS) transactions. Developed, owned and operated by the market, and endorsed by the Eurosystem, ED helps facilitating risk assessment and improving transparency standards for European ABS deals.

This internship program is the best opportunity to get a first-hand experience and exposure in all aspects of ED business areas. The typical duration is 3 - 6 months.

Internship Customer Support - Finance (m/f)

Responsibilities:

- Analysing our financial instruments performance database to leverage the information to the benefit of our customers.
- Supporting our Customer Account Managers with their daily work (e.g. data entries, preparation of presentations, testing software and generating reports in CRM).
